

Juan Ramón Knaster

Juanra started his career in CIEMAT for the TJ-II in the 90s during its design and installation phase. His international adventure started at the end of that decade in Geneva working in CERN for the LHC design and construction. In 2005 he resigned from his position in CERN to come back to his professional passion and joined the ITER international Team from Garching and Naka in its Magnet division as responsible of the TF coils system. In 2012, he joined F4E and moved to Japan as Project Leader of IFMIF/EVEDA, where he stayed until 2018, when he returned to Europe. He is presently based in Cadarache working for ITER project as EUDA Representative.
