

Dr. Michael Churchill is a fusion energy scientist and engineer at the Princeton Plasma Physics Laboratory (PPPL), where he serves as AI for Science lead and Head of Digital Engineering. His expertise lies in leveraging machine learning and computational modeling to accelerate the design and simulation of fusion devices, including tokamaks and stellarators, aiming to advance predictive and digital twin capabilities in fusion energy. Dr. Churchill earned his Ph.D. in Nuclear Science and Engineering from the Massachusetts Institute of Technology (MIT) in 2014, conducting experimental work on the Alcator C-Mod tokamak, and holds a B.A. in Electrical and Computer Engineering from Brigham Young University.
