

Dr. Frank Tecker brings more than three decades of experience to the field of accelerator physics, with a distinguished career centered on the operation, development, and instruction of advanced particle accelerator systems. He holds a PhD from RWTH Aachen University, an academic tenure that included extensive research residencies at CERN. Since then, his expertise has spanned multiple international laboratories, where he has contributed to a wide variety of operational and future-generation accelerator projects.

A dedicated educator, Dr. Tecker has a long-standing history of teaching accelerator physics at Oxford and across numerous international accelerator schools. In 2022, he was appointed Director of the CERN Accelerator School (CAS), where he lectures on diverse aspects of the field. In this leadership role, he is committed to training the next generation of scientists, fostering international networking, and enhancing the societal visibility of accelerator physics.
