

Javier Jimenez, MD, MPH, joined PharmaMar in May 2024 as Chief Medical Officer. In this role, Dr. Jimenez drives the integrated evidence generation planning and delivery for PharmaMar marketed and in development compounds, leading the Clinical Development and Medical Affairs functions and harnessing data, analytics and technology for new approaches to oncology evidence generation to accelerate clinical development and access to PharmaMar medicines.

Prior to PharmaMar, Dr. Jimenez served as Chief Medical Officer at Flatiron Health partnering with top oncology pharma companies to support development and access of multiple oncology products and Executive Vice President Late Phase at Syneos Health, with expertise spanning Clinical Development, Medical Affairs, Market Access and Product Commercialization. Dr. Jimenez started his journey in the pharmaceutical industry over twenty-five years ago, spending sixteen years leading global evidence generation teams for clinical development, medical affairs and market access across the US and Europe at AstraZeneca. Dr. Jimenez's vast experience in Oncology includes leading AstraZeneca's collaboration with ASCO's CancerLinQ. Following his time at AstraZeneca, Dr. Jimenez spent four years building Artificial Intelligence and Clinical Outcomes functions and capabilities at Sanofi to support all Sanofi Global Business units. As an MD and evidence generation methodologist Dr. Jimenez is a passionate champion in the use of innovative evidence generation approaches to accelerate clinical development, regulatory decision making and innovative medicines patients' access
