

## **Patricia Martín**

Patricia Martín holds a degree in Physics from the University of Granada and a Master's degree in Digital Business. She has extensive experience in the industrial sector, where she has led factory digitalization programs and Industry 4.0 initiatives, driving the adoption of advanced technologies and new operational models. She currently works at IFMIF-DONES, where she is responsible for Operation and Maintenance, as well as for the design and deployment of the project's artificial intelligence strategy. Throughout her career, she has promoted and coordinated several AI projects at both European and national levels, focused on applications in accelerator-based facilities. Notable among these are TwinRISE and DONES AXIA, selected for their innovative approach and their impact on integrating AI solutions into complex, high-demand scientific infrastructures.
